DETAILED ACTION

Claim Rejections - 35 USC § 103

1. The following is a quotation of 35 U.S.C. 103(a) which forms the basis for all obviousness rejections set forth in this Office action:

(a) A patent may not be obtained though the invention is not identically disclosed or described as set forth in section 102 of this title, if the differences between the subject matter sought to be patented and the prior art are such that the subject matter as a whole would have been obvious at the time the invention was made to a person having ordinary skill in the art to which said subject matter pertains. Patentability shall not be negated by the manner in which the invention was made.

2. Claims 1 and 2 are rejected under 35 U.S.C. 103(a) as being unpatentable over Johnson (US 6,251,209) in view of Francis, Jr. (2,464,301).

Johnson disclose an apparatus for making and filling a bag with a strippable seal comprising a pair of thermal sealing bars 2159 for embossing a wavelike or zig-zag shape upon the bag material 2056 passing between; see figures 19 and 33.

Johnson does not disclose the seal former as a pair of thermal rollers, however Francis, Jr. teaches thermal rollers 45 and 46 (figure 6) with annular projections for embossing/forming the web passed between a nip for conveyance. It would have been obvious to one of ordinary skill in the art to use thermal rollers with annular projections as taught by Francis, Jr. as a substitution for the sealing bars of Johnson for forming the wavelike seal.
